

# F-Series

## Masks for every situation

Foldable non reusable mask  
FFP1 NR | FFP2 NR | FFP3 NR  
with and without valve

- tested and CE-certified according to EN149:2001 + A1:2009
- special foam seal at the nose region (prevents fogged glasses)
- high wearing comfort
- secure and tight fit through headbands

### THE MASK

The low breathing resistance and high filtering performance of the F-Series ensure that the masks of this type provide effective protection even during heavy physical work. Spectacle wearers, in particular, benefit from the special foam seal in the nose region, which particularly reliably prevents side flows of air when breathing out. In all three protection classes, the F-Series is equipped with head bands that guarantee a secure fit.

### STANDARDS & APPROVAL

The F-Series meets the requirements of the European standard EN 149:2001 + A1:2009 for particle filtering half masks. The products are classified in categories FFP1, FFP2 and FFP3 according to their filtering performance and total leakage.

This product meets the requirements of the PPE regulation (EU) 2016/425 and therefore carries a CE mark. The EU-Type Examination Certification (Module B) and the Quality Assurance Certification (Module C2) have been issued by LGAI Technological Center, S. A./Applus, Campus UAB, Apto Correos 18, 08193 Barcelona, Spain (Notified Body Number: 0370).

### Application limits by class:

Class	Multiples of the OEL
FFP1 NR	4
FFP2 NR	10
FFP3 NR	30

Do not reuse

Attention, see instructions for use

Don't use when packaging damaged
