

Glove "BBE-Strong"

Protection in everyday life

Disposable high density polyethylene (HDPE) glove

- Category I personal protective equipment
- extremely tear-resistant and robust
- ideal protection for short-term work
- comfortable to wear
- suitable for kitchen, food processing and industry
- embossed, non-sterile
- reliable and inexpensive

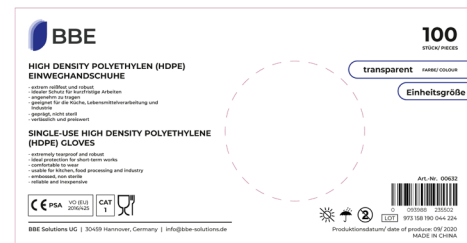

Glove

The glove "BBE-Strong" is made of high density polyethylene. The special embossing results in a high tear resistance. This inexpensive glove is particularly suitable for use in public areas: local public transport, shopping, visits to authorities. By using this glove, you can reduce the use of disinfectant to a minimum and thus protect your skin. This glove is also optimally suited for short-term use in medicine or industry.

STANDARDS & APPROVAL

The "BBE-Strong" glove meets the requirements of the regulation (EU) 2016/425 and therefore carries a CE mark. It is a category I product with a low risk. The manufacturer carries out an internal production control (module A) according to annex IV.
